BIBUS HOLDING

Network of expertise – partners for technology, materials and electronics

**We are a leading company
in our core activities
and offer our customers
high quality products
and services.**

**The keys to our success are
the network of expertise
and the skills of
our employees.**

Supporting Your Success

Together with our partners, managers and employees, we have continued to build on the foundation laid by Dipl. Ing. Hans Bibus in 1947 and already further expanded and developed by his son Felix Bibus.

From being exclusively a steel trader, without its own warehouse, the individual company has developed over the decades more and more in the direction of its current three business segments: technology, materials and electronics. The same core competencies are pursued in all three segments: engineering, logistics and services – to differing degrees depending on the business segment.

The value added that we produce for our customers, the tasks that we fulfil for our customers, has fundamentally changed over the decades, always focused on covering the perceived changing needs with appropriate services – internationally. International progress in the area of communications and the associated “general” knowledge of foreign procurement sources have triggered and promoted the first steps for further development, towards new, company-specific expertise. Pure steel trading was slowly replaced by the addition of new technological products requiring explanation or engineering. The step from the individual company to a corporate group was complete.

The Swiss market alone proved to be too small over the years of successful growth. The removal of borders in Europe promoted the strategy for growth beyond the borders of Switzerland and as far as Asia. The simultaneous internationalisation of the activities of our formerly exclusively Swiss customers and their support also at other locations supported its implementation. Care of existing customers and the acquisition of new customers and partners in new markets shape the activities of our subsidiaries also outside Switzerland: extend established, proven relationship and supplement with new one – on the side of the customer and on the side of the delivery partners.

The product range is not the same in each of the subsidiaries – but each one offers the same services as core competencies: engineering, logistics, services – and each of the companies has access to the know-how and resources of the whole group. For the customers, the delivery partners and for the employees, this is a concept which has led and will in the future lead to long-term, successful partnerships.

Christian Bibus

Conrad M. Ulrich-Bibus

Technology

Mechatronics and hydraulic technology for the machine and automotive industry

Over 60 years of experience

***in the fields of hydraulics,
pneumatics, machine
elements, mechanical
components and systems.***

***Core competencies in the
development and manufacture of
assemblies, hydraulic systems***

***and units as well as
in the development and
packaging of
special components.***

BIBUS AG and its subsidiaries as well as BIBUS HYDRAULIK AG and SAUER BIBUS GmbH are companies with more than 60 years of experience in the fields of pneumatics, machine elements, electrical engineering/electronics, automation and hydraulics. They sell components of renowned manufacturers and produce systems. As technically qualified trading companies, they offer expert advice and deliver the right products of the required quality on the agreed delivery date at a fair market price.

The customer-centred in-house sales support and broad stock-keeping guarantee fast order processing. The companies of the BIBUS group in the technology segment are ideally equipped for the development and production as well as for the packaging of special components.

The technology segment has core competencies in custom plant and assembly construction – from the prototype to series production – as well as in the development and assembly of complete assemblies and drive systems for stationary and mobile applications. State-of-the-art test benches enable simulations, series and individual tests of components and complete systems.

**Pneumatics
Hydraulics**

Logistics
Hydraulic and pneumatic components from stock

Engineering
Planning, development, production and commissioning of hydraulic and pneumatic drive and control systems as well as plants. Development and production of special products, assembly of components, assembly construction

Service
Upkeep, service and repair of hydraulic products. Testing and inspection of components and complete systems, commissioning and training

Mechatronics

Motors, gears, controls, couplings, guideways and taper keys torque transmission from stock

Design and assembly of electro-mechanical drives, manufacture of special products

Maintenance, repair and service, spare parts management

Sensors and switches, safety technology and automation components

Planning, design and construction of systems and plants for automation of processes, safety and monitoring systems

Maintenance, repair and service, spare parts management, packaging of components ready for assembly

Environmental technology

Feed pumps for liquid and gaseous media, accessories for waste water technology

Planning and development of systems and plants

Maintenance, repair and service, spare parts management

e-manufacturing

3D printers and scanners as well as consumables, accessories and 3D software

Planning of complete solutions for rapid prototyping and production

Production of sample parts, upkeep of machines and plants, consumables and spare parts management

Materials

Materials and metallurgic products for various areas of applications

***The cultivation of long-term
partnerships with our customers
is the benchmark for our
day-to-day work.***

***Over 100 employees in the
Materials group are committed
to meeting individual needs and
providing reliable logistics
solutions and services.***

The BIBUS companies in the Materials group, SAUTER EDELSTAHL and BIBUS METALS and their subsidiaries, are international commercial enterprises. They serve the mechanical engineering and aerospace industries, the metalworking industry, construction and related trades, the chemical and food industry, medical technology, electronics and electrical engineering, environmental, gas and water management as well as the petroleum industry.

A comprehensive range of high quality products with professional, individual support as well as efficient logistics and warehousing are the bases for optimum market solutions in the interests of the customers. The cornerstones of this are diversity, experience and flexibility. Synergies are bundled to sustainably strengthen the long-term competitiveness of partners: Supporting Your Success.

SAUTER EDELSTAHL
Stainless high-grade steels
Aluminium
Fittings
Food fittings

Products
 Over 5,000 tonnes of aluminium and high-grade stainless steels – sheets, tubes, bar steel, fittings and food fittings – in a wide range of qualities and designs

Logistics
 High-grade steels and semi-finished aluminium products are available from stock in over 15,000 m² of warehouse space. Skeleton agreements and consignment stocks are supported by an efficient transport and warehousing system

Service
 Comprehensive services: re-stamping, certification, coating, grinding, brushing and polishing; large sawmill for precision and mitre cuts; fully automatic cut-to-length line

BIBUS METALS
Titanium and nickel alloys
Zirconium
Tantalum
Welding material
Centrifugal casting
Duplex steels

Warehousing of over 600 tonnes of nickel alloys and titanium. Semi-finished products in the form of sheets/plates, strips, bars, tubes/pipes and fittings as well as welding materials

Production of components according to customers' drawings, welded constructions, turned parts and forged parts, compilation of complete packages for projects

Cutting service, shearing, sawing, cutting by plasma/laser, cutting by water jet, forging, heat treatment, re-stamping

Metallurgic products

Special profiles in various steel alloys

Call-off orders, warehousing

Special profiles according to our own and customers' drawings

Electronics

Industrial computers and electronics for highest quality requirements

***We strive to be your partner,
to establish your requirements,
to understand them and then
to implement them in an
innovative and integrated
solution which increases your
effectiveness. Our success is
based on the development and
sale of electronics which are
centred on the needs of industry.***

MPL AG develops and produces high quality industrial PCs and systems based on the needs of industry, which are used worldwide. The success story of the company is based on the concept: minimum power consumption, an extended temperature range and a robust design. The solutions are innovative, with guaranteed long-term availability, without fans and therefore low maintenance and unique.

Due to the high quality, the products and solutions which have proven themselves a thousand times over are frequently used in the harshest industrial environments – but also in medical, transport and marine technology, in aeronautics, space and defence technology – wherever a really reliable product is needed.

MPI Distribution AG is a trading company in the fields of electronic components and industrial PCs. It sells systems and components of MPL AG as well as of renowned foreign manufacturers. As a technically qualified trading company, the firm offers expert consulting and delivers the right products of the required quality on the agreed delivery date at a fair market price. The customer-centred in-house sales support and broad stock-keeping guarantee fast order processing.

Elsoft AG specialises in the development of drivers, support and adaptation of real-time operating systems, BIOS, LINUX and Windows operating systems, the integration of network technologies and the design of websites.

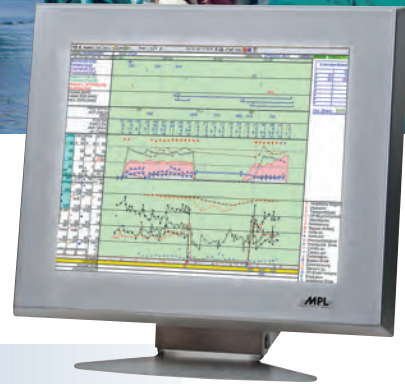

Industrial computer electronics and systems

Logistics
 Robust industrial computers, PCs and systems with Intel, PowerPC and ARM processors, unique peripherals for industrial applications, industrial single board computer solutions, IP65 fan-less panel PC solutions in aluminium and stainless steel

Engineering
 Development of standard products for use under difficult conditions, semi-custom products and solutions adapted to customers' requirements. Hardware and software development for custom solutions, know-how in analogue and digital designs, low-power and DSP designs, VHDL & ASIC developments. OEM and complete system solutions

Service
 Commissioning, training, repairs

Electronic components, displays and computer systems

Active electronic components and displays, industrial computers and systems. Comprehensive stockkeeping

Consulting and projecting, custom solutions in the areas of solid state relay assemblies, computer boards and peripherals and LCD displays, production, assembly of components, configuration and tests of industrial computers

Commissioning, spare parts management

Software

Sale of drivers and operating systems

Consulting and support, implementation as well as development of complete software solutions

Web design, software support
